Interactive Self Serve Ordering Kiosk

Popstar Networks Digital Menu Boards move as fast as your business

As the cornerstone of Popstar Networks QSR Solutions, Popstar Digital Menu Boards (DMBs) address your most complex needs and highest standards for highlighting key products, promoting specials by store, and managing content throughout your network.

Features

Popstar DMBs deliver a robust set of features to enable fast, easy content management for your most dynamic displays:

- Innovative user interface for quick, easy content updates
- Centralized control for content management, with local access for troubleshooting
- Easy management of images, video content, price data, item descriptions, and nutritional information
- Advanced content assignment and scheduling capabilities
- Manage changes to the entire network, specific segments, or individual locations

Benefits

Popstar DMBs provide the speed and efficiency required to maximize the effectiveness of your digital signage network.

- Easy update or remove item descriptions, pricing, or nutritional information
- Schedule and rotate content based on season, week, day, or time of day (day-parting)
- Test pricing and promotions on the fly with database-driven pricing and item information
- Advanced core processing technology enables less on-site equipment, less maintenance, and lower overall costs
- Ideal for medium- to large-scale deployments, managing content for dozens to thousands of locations
- Seamless integration with other Popstar QSR Solution components
